

You heard it. They heard it. Now keep it going.

You and your students experienced the same talk through different perspectives. So how do you keep the conversation going in the classroom? Here are some ideas. Take what you like, leave the rest. Change it, modify it, play with it.

1 Post-presentation reflection

Since you and your students both experienced the presentation through different lenses, there's an opportunity to reflect on it together.

- 1 What part of the talk stuck with you most?
- 2 What surprised you?
- 3 What's a black dot people our age deal with?
- 4 Where do you see white space in your life right now?
- 5 What has the 80% been telling you lately?
- 6 What's one thing you're grateful for, even when it's hard?
- 7 How did it feel knowing your teachers heard this too?
- 8 How can we find white space together as a class?

Teacher answers too. No one has to share their black dot out loud. If a student needs more support, loop in your counselor or SAC.

For you, as the educator

- What did you notice in your students during the talk?
- What's your black dot this year? What do you have despite it?
- How can you practice acceptance and gratitude in your life and in your classroom?
- What did you hear that you needed for yourself?
- How can you model a perspective shift for your students?

"If you change the way you look at things, the things you look at change."

WAYNE DYER

2 The shared language

Keep the language alive in your classroom all year. You both know it, so revisit it often.

 The 80% Some studies estimate 80% of our thoughts are negative. "Is that the 80% talking?"	 Black dot The one thing going wrong we can't stop staring at. "What's your black dot?"	 White space Seeing what you have in the midst of not getting what you want. "What do you have right now, despite your black dot?"
 Perspective How are you looking at the situation? "Are you open to seeing it differently?"	 Acceptance Focusing on what's in your power and letting go of what isn't. "What's in your control? What's not?"	 Gratitude Finding the good when it's hard. "What's still good?"

3 Ideas for your classroom

Quick ways to keep it going. Use what fits.

 Check-in "1 to 10, how loud is the 80% today?"	 After a setback "This is a black dot. What are you grateful for in spite of it? What's in your control? What's not?"	 White space wall Sticky notes of good things. Add to it all year.	 Dot sheet Black dot in the middle. Fill the white space around it.	 Gratitude jar Drop in one good thing. Read a few on Fridays.
 Exit ticket "I can't control ___, but I can still ___."	 80% door meter A 1 to 10 scale by the door. Students tap their number.	 Friday shout-outs Name someone else's white space from the week.	 Turn and talk Two minutes: black dot, then white space.	 Four corners Black dot, white space, perspective, gratitude. Pick one, say why.

Thank you

Thank you for the work you do, and for allowing Erin to share, learn, and grow with your students. Keep shining. Keep finding your white space. **You deserve it, and your students do too.**
